AIM

To Perform junit Testing to Check Whether the given number is palindrome or not.

PROGRAM

```
package sse;
import java.util.Scanner;
import static org.junit.Assert.assertTrue;
public class palindrome
{
     public static void main(String args[])
     {
           Scanner in = new Scanner(System.in);
           int r, sum = 0, temp; int n = in.nextInt();
           temp = n;
           while (n > 0)
           {
                r = n \% 10; n = n / 10;
                sum = (sum * 10) + r;
           }
           System.out.println(sum);
           assertTrue(787==sum);
           if(temp==sum)
                System.out.println(sum+" is palindrome number");
           else
                System.out.println(sum+" is not palindrome number");
           }
     }
```

```

RESULT

Hence the junit Testing Check Whether the given number is palindrome or not performed successfully.
